# Challenge Two: Solving sudoku with pseudocode.

section
used

- Write the numbers from 1-9 [1,2,3,4,5,,6,7,8,9]
- In the first section of numbers check to see which numbers are missing
- Mark down the numbers that are missing
- Check if the number that you have chose to put in the blocks are already is available.
- If not you may place that particular number.
- If the particular number is in the same row (vertically/horizontally) you can't use that number
- Do the same thing with the rest of the section

9	3	6	1	4	5	7	2	8
8	1	5	9	7	2	4	6	3
7	4	2	8	6	3	9	5	1
4	8	7	5	1	9	6	3	2
5	2	9	7	3	6	1	8	4
1	6	3	8	8	4	5	9	7
3	7	8	6	5	1	2	4	9
2	5	1	4	9	8	3	7	6
6	9	4	3	2	7	8	1	5
